B324 Broad Spectrum Resin Ribbon

After being evaluated by some of the top manufacturers of synthetic base label material, ***B324 Broad Spectrum Resin Ribbon*** is being recognized as one of the best performing general resin ribbons' in the industry. Through our extensive R & D process and stringent quality control measures, we are proud of the industry leading performance characteristic that is helping B324 Broad Spectrum Resin Ribbon become the "go to" product in harsh printing applications. B324 Broad Spectrum Resin Ribbon is ideal for tough general variable printing applications such as; automotive emission labels and other under the hood applications that until now always required an over laminate to meet the tough standards called for by the Automotive OEM's.

B324 Broad Spectrum Resin Ribbons, like all of ITW Thermal Films products are available for immediate shipment. Please contact your ITW Thermal Films representative to receive our label recommendations and a free sample of B324 Broad Spectrum Resin Ribbon.
